Nibble

CODE.INIT() '23

# **PermINIT is an automated email based permission generator.**

**Do you struggle to write emails or don't get the right words while writing for permissions. Enter basic details and PermINIT drafts the mail for you and sends it to the recipient.**

# Problem Statement

1. Delay in asking for permissions due to miscommunication and barriers.
2. Time consuming to write emails with a specific format which can be made more efficient
3. Collision in case of multiple request and tracking of requests.

**PROTOTYPE**

# Additional Features

- 1.Login Access for approval and template updation.
- 2.Google Auth verification
- 3.Dashboard with request history and approval notification
